

KELROY JAMES

Supply Chain Assurance (Logistics & Movements) | Operational Controls | Governance, Risk & Compliance

kelroydbjames@gmail.com | linkedin.com/in/kelroy-james | kelroyjames.com

PROFESSIONAL SUMMARY

Public sector supply chain assurance professional with 18 years' Royal Navy experience across logistics and global movements, preceded by 12 years in critical national infrastructure. As a first-line control owner, led the investigation and remediation of an account rated unsatisfactory at independent inspection, restoring full compliance within 12 months. Separately, identified £2.4M in misallocated expenditure on an adjacent account through a review of annual inventory demands, and led the root-cause analysis that supported its correction. Experienced in financial controls, operational assurance and reporting to senior command. Seeking roles in supply chain assurance, operational controls and related governance, risk and compliance work.

Core Skills: Supply Chain Assurance | Global Movements | Operational Controls | First-Line Risk Ownership (1LOD) | Financial Control, Root-Cause Analysis & Remediation | Senior Stakeholder and Command-Level Reporting | Governance, Risk & Compliance (GRC) | Public Sector Assurance & Compliance | Lean Six Sigma Green Belt (Continuous Improvement) | Team Coaching & Development | Concurrent Workstream Management | Three Lines Model | ISO/IEC 27001, 42001, 27701 Lead Auditor | Data-Driven Reporting (SQL, Python) | PRINCE2 Project Governance

PROFESSIONAL EXPERIENCE

Petty Officer (Supply Chain)

Royal Navy | Sept 2026 - Present

- Between postings; next appointment as Movements Petty Officer with a specialist unit

Petty Officer (Supply Chain Manager) - first-line control owner (1LOD)

Royal Navy, Front-Line Warship | May 2024 - September 2026

- Took over a public sector account rated unsatisfactory at independent inspection; led the remediation that restored full compliance within 12 months
- Identified £2.4M in misallocated expenditure on an adjacent account through a review of annual inventory demands, and led the root-cause analysis that supported its correction
- Briefed findings and control-redesign recommendations to the Logistics Officer, who took them forward to the policy authority as a proposed policy instruction
- Managed a varied, concurrent workload: financial-control investigation, asset verification and documentation remediation, and a data-quality rebuild for the unit's inventory system, each to its own plan, evidence standard and deadline
- Reduced financial liability on the same account by 80% by closing 15 loss cases through asset verification and investigation, alongside the inspection-finding reduction
- Assessed favourably against the wider peer group at the most recent appraisal
- Founded and led a standing junior-rate coaching and development programme, adopted as recurring practice within the department

Petty Officer (Supply Chain and Global Movements)

Royal Navy, Wildcat Maritime Force | Apr 2022 - May 2024

- Consolidated a dispersed, effectively unauditible asset base into a single accountable holding, closing 14 major loss investigations through evidence-based reconciliation
- Held concurrent responsibility for the unit's global movements coordination, alongside stores accountability, covering international freight, customs documentation and multi-modal consignment tracking across deployed locations
- Led a nine-person team through concurrent operational commitments, including support to a £5M weapons trial; six of the nine have since been promoted
- Turned round a rejected compliance consignment in three days to protect a fixed external deadline, and recovered a mid-exercise equipment shortfall with three hours to spare

Section Head, Supply Chain (Petty Officer)

Royal Navy, Surface Flotilla Engineering Support | Jun 2021 - Apr 2022

- Held first-line assurance responsibility for compliance-tool testing across three ship classes from the point of promotion
- Led the logistics workstream of a lean-maintenance pilot: £145,674 of stores handled with zero losses on return, and the highest rate of demands placed on time of any comparable support period that year
- Selected for a 12-week Defence innovation fellowship; delivered a project on consignment-tracking process redesign

Earlier Royal Navy Postings - Assurance, Compliance and Movements

Royal Navy, various units | 2008 - 2021

- Selected for promotion to Petty Officer (Supply Chain) in October 2020; completed the Senior Rate Leadership Course and served within a Class Output Management Cell (Fleet Time Support Period) ahead of appointment as Section Head, Supply Chain in June 2021
- Deputised for full account ownership through an intensive pre-deployment compliance work-up; coordinated a safety-critical evolution with external regulatory stakeholders and no senior oversight
- Provided 24/7 watchkeeping cover for fleet-wide operational-defect logistics, supporting three concurrent, globally distributed operational commitments

- Designed and delivered a PRINCE2-governed consignment-tracking capability, removing a manual, error-prone workaround and sustaining operations across four nations; awarded the Chief Naval Logistics Officer's Award for the coaching and mentoring delivered alongside it
- Rated the strongest among peer Leading Hands across two reporting periods
- As Low Value Procurement Officer during a Falklands posting, sole point of contact for the deployed unit's financial and asset compliance, managing a recurring procurement budget and cutting low-value transaction volume by 80%; separately restructured MOD inventory-accounting practice across a NATO multinational headquarters

GIS Analyst & Infrastructure Planner - Critical National Infrastructure

St Vincent Electricity Services | 1996 - 2008

- Twelve years in a national utility, a critical national infrastructure environment, advancing from front-line operations to infrastructure planning through self-directed development
- Led GPS-based mapping of national grid infrastructure, underpinning an Esri Special Achievement in GIS award-winning system

EDUCATION & QUALIFICATIONS

- ISO/IEC 27001:2022, 42001:2023 & 27701:2025 Lead Auditor; Fellow of Management Systems Auditing (FellowMSA)
- Lean Six Sigma Green Belt (LSSGB), Star Global College of Workforce Development - Feb 2026
- MSc Supply Chain and Logistics Management (Defence Logistics Staff Course), University of Lincoln, accredited by CIPS, CILT and IEMA - in progress, Apr 2025 - Mar 2027; route to MCIPS
- MicroMasters, Supply Chain Management & Advanced Network Design, MIT Center for Transportation & Logistics - coursework complete (5 core courses + advanced elective); final exam November 2026
- MicroMasters, Predictive Analytics using Python, University of Edinburgh: 2021 - 2022
- BSc (Hons) Logistics and Operations Management, Aston University - 2:1
- Professional Award in Cyber Security & OSINT, Abertay University - Distinction

SUPPORTING EVIDENCE

Full case studies with methodology and evidence for every figure above: **kelroyjames.com**

- Identifying £2.4M in Misallocated Funds - financial-control investigation and root-cause analysis on an adjacent account
- Restoring Control to a Failing Account - controls design and remediation following independent inspection findings, account taken from unsatisfactory to fully compliant
- Modernising Assurance Across Inspections - first-line control framework built on ISO management-systems standards, Lean Six Sigma and the Three Lines Model
